

Description:

Provides students with ability to recognize and treat the four major life threats as follows:

- **Heart Attack**
- **Cardiac Arrest**
- **FBOA (Choking)**
- **Stroke**

All the above are covered for treatment of *adults, children and infants*. It also covers the use of the very important AED (Defibrillator) device, which can be so important in the initial minutes following cardiac arrest. Plenty of practical work and multi-choice question exam.

Ideal course for parents, workers and people involved in sports.

Duration: One Day (6 Hours)

Max Number of Students: Six

Certification:

Certificate issued by the Pre-Hospital Emergency Care Council (PHECC) and valid for 2 years will be issued to each successful student.

Cost: €125
